# Challenges for moving forward to Digitalized the services

- ❖ Accessibility: not all the users in the rural can't access to employment service systems due to internet connection and digital literacy.
- ❖ Data privacy and filled requirement: Not everyone has understood the system rules and skills associated with occupation by ISCO definition, and users need simple fill-in information.
- ❖ Difficulty engaging users to use the system.
- ❖ Operation and maintenance system
- ❖ The capacity for web/app development skills is limited

# Further development plan

Plan to enhance the functionality of the website and mobile application and build capacity.

## Website

- To develop LMI functions system
- To Improve job seeker, employer registration functions
- To improve capacity of rest API functions & Server , and security between the application and server
- To learn and discover new and accepted technologies such as AI function, Cloud computing, Big data for CPES System.
- To improve job matching and referral functions
- Database System Integrations for Mobile Application & Website.
- To improve job applicate tracking functions for internal portal
- Enhance service users, UI/UX and functions features
- Up-to-date next generation for CPES System(2.0)

## Mobile App

- To improve job search function including auto suggestion word and intelligent search functions
- Job Alert and Notification Feature
- To add new job-offer notifications functions
- Job seeker registry and résumé display functions
- To improve Apply for a job functions
- To enhance UI & UX functions.
- To add nearest feature on the mobile application with Google's map API.
- To develop LMI info view functions
- To update rest API server functions

## Capacity building of IT staff

- To enhance the capacity building of IT staff to develop software, websites, mobile applications, and computer network skills.

Thanks!
